

# Women in Alberta

## Education

### Highest level of educational attainment

- ◆ In 2011, the majority of women (63.7%) and men in Alberta (64.1%) reported having postsecondary education (i.e., postsecondary degrees, diplomas or certificates). Women and men in Canada had generally the same level of postsecondary attainment (64.8% and 63.4%, respectively).
- ◆ Approximately one in eight people living in Alberta did not have any type of diploma or degree (including a high school diploma). This proportion was greater among Aboriginal women (29.0%) and Aboriginal men (31.9%). Similar proportions were observed at the national level.
- ◆ Women in Alberta were less likely than men to not have a diploma or degree (11.4% of women compared to 13.2% of men). The opposite was true for visible minority populations, where 12.2% of women did not have a diploma or degree compared to 10.3% of men.
- ◆ In 2011, the proportion of women whose highest level of educational attainment was a high school diploma in Alberta (24.9%) was higher than that of men (22.7%). Similarly, a high school diploma was the highest level of education for more women (23.6%) than men (22.8%) in Canada.
- ◆ In Alberta, Aboriginal women (48.2%) had higher postsecondary attainment than Aboriginal men (44.9%). Similar proportions were observed for Aboriginal women and men across Canada.

Source: Statistics Canada, 2011 National Household Survey

- ◆ Visible minority women and men in Alberta were more likely to have postsecondary education (69.1% and 70.5%, respectively) than all women and men in Alberta. These proportions are slightly higher than those of visible minorities at the national level.

### Postsecondary attainment

- ◆ In 2011, a higher proportion of women had a college or non-university degree or diploma as their highest level of education than men in Alberta (24.6% and 18.2%, respectively) and across Canada (23.8% and 18.6%, respectively).
- ◆ In Alberta, men were around three times more likely than women to have an apprenticeship or trade accreditation (18.1% compared to 6.3%). By comparison, men in Canada were about twice as likely as women to hold an apprenticeship or trade (16.0% compared to 8.3%). Similar proportions were observed for Aboriginal men and women in Alberta and Canada.
- ◆ Visible minority individuals in Alberta had lower proportions of apprenticeships and trades accreditation (7.8% of men and 4.1% of women). At the national level, these proportions were slightly lower for men (7.3%), but higher for women (5.5%).
- ◆ In Alberta, the proportions of visible minority individuals with a university degree at the bachelor level or above (40.3% of women and 41.2% of men) were higher than the overall provincial proportions (27.3% of women and 23.9% of men).
- ◆ More Aboriginal females had a bachelor and above degrees as their highest level of education (10.6%) than their Aboriginal male counterparts in Alberta (6.1%). This was also true for Canada as a whole.

### Top postsecondary fields of study

- ◆ In 2011, three categories were included in the top four lists of fields of study for men and women in Alberta (based on the highest proportion of individuals enrolled): business, management and public administration (8.1% of men and 14.3% of women), health and related fields (3.0% of men and 12.9% of women), and social and behavioural sciences and law (3.0% of men and 6.1% of women).
- ◆ Education was one of the top four fields of study that applied to women only (6.3% of women compared to 2.1% of men enrolled). Architecture, engineering, and related technologies had the highest enrollment of men, but was not in the top four list for women (26.5% of men compared to 2.6% of women).
- ◆ For visible minority men in Alberta, mathematics, computer and information sciences (4.3%) replaced social and behavioural sciences and law (3.7%) in the top four fields of study.
- ◆ In 2011, business, management, and public administration was the top field of study for all women (14.3%), Aboriginal women (11.5%) and visible minority women in Alberta (16.0%). This was also the top category for women at the national level.
- ◆ Architecture, engineering, and related technologies was the top field of study for men in Alberta, accounting for 26.5% of male postsecondary attainment. This category was also the top category for Aboriginal (19.4%) and visible minority men (25.3%). At the national level, this category accounted for 22.0% of male postsecondary attainment.
